

The Technician Prayer

Dear God, I pray as I start another day,
please put behind the trials the stress of
yesterday.

Help me understand with each day I
learned some more, improvements are
made daily, that's what challenges are for.
Assist me in my weakness, I need help on
how to deal, hateful words they hurt me, I
pray most aren't for real.

Remind me of my purpose, I am more than
just a tech, knowing I'm important helps
keep my doubt in check.

This is more than just a job, the Icare
values are in effect. With integrity,
compassion, accountability, equity and
respect.

I know I won't be easy, I'm not alone I have
my team, when we work together, our
success we redeem.

So as my shift begins, my prayer ends with
one last hope. Provide me with the
strength to overcome, forgive, to cope.
And if my in day ends roughly, to difficult
to share, I'll start my next tomorrow with
this technician prayer.
