

Writer's Block

I haven't written in a while so I'm struggling a bit,
the thoughts are there but the words just don't seem
to fit.

Writer's block, it's truly a writer's greatest fear,
but a hiatus from writing will allow your thoughts
to be clearer. A simple break, that is all that's needed,
for you to start feeling less like a writer who's been defeated.

I know this temporary disability well because writing is my release,
it gives me clarity but also brings me peace. It's how I turn my thoughts
into something more concrete.

Writer's block can be my kryptonite, but it's affects
will only last for so long. As I begin to write more,
my immunity to it builds. Writer's block tried to keep me
stagnate but my undeniable creativity provided a shield.

Today I put writer's block on notice that I am here
to stay. I won't be frightened of it nor will I let it
steer me away.

Writer's block, your so out of touch. In my thoughts is
where you don't belong, so make your exit because you've
been bested. My passion for writing is far too strong.
